FOR IMMEDIATE RELEASE

RAPID MILITARY IMPLEMENTATIONS OF ESSENTRIS EMR EXTEND CLINICOMP'S LEADERSHIP IN ENTERPRISE AUTOMATION

Army and Navy military treatment facilities automate inpatient documentation last quarter

SAN DIEGO – Jan. 11, 2010 – [CliniComp Intl.](#), a global provider of clinical documentation systems, announces that during fourth quarter 2009 four military treatment facilities within the U.S. Navy and Army went live with the [Essentris® inpatient clinical documentation solution](#). CliniComp will be demonstrating the *Essentris* suite at the Society of Critical Care Medicine's Annual Congress in Miami from January 10-12 (booth # 1211).

Over a two-month period, the following provider organizations completed their enterprise-wide deployments of *Essentris* within these departments:

- **Naval Hospital Oak Harbor, Wash.**, went live in Labor and Delivery (L&D), Same Day Surgery (SDS), Post Anesthesia Care Unit (PACU) and the Multi-Service Ward.
- **Irwin Army Community Hospital, Fort Riley, Kan.**, installed *Essentris* in the Mother Baby Unit (MBU), SDS, PACU, Med-Surg and Intensive Care Unit (ICU) units.
- **William Beaumont Army Medical Center, El Paso, Texas**, a decade-long user of *Essentris* in L&D and in the MBU, upgraded to the latest software release. Additionally, the provider expanded *Essentris* to the ICU, Med-Surg and Pediatric units as part of a larger [Department of Defense \(DoD\) contract](#) with CliniComp.
- **Naval Hospital Lemoore, Calif.**, rolled out the system in the Mother Infant Unit (MIU), SDS and PACU.

“Since 1983, CliniComp has been an EMR leader supporting the highest quality of care for critically ill patients. With President Obama elevating healthcare reform and IT funding to national priorities, clinical automation of high acuity areas is getting attention that is long overdue,” said Alan Portela, CliniComp's President. “These four military medical facilities' *Essentris* implementations build upon the DoD's impressive 55 percent EMR adoption rate in critical care areas. They prove the breadth and scalability of our

solution as well as the efficiency and speed of our implementation methodology. Equally important is the close collaboration between our customers and CliniComp.”

CliniComp’s *Essentris* system is a multidisciplinary EMR suite encompassing inpatient documentation, reporting and clinical surveillance for enterprise-wide workflow support to acute care hospitals, academic medical centers and integrated delivery networks. *Essentris* streamlines clinical workflows, simplifies access to unified patient data and helps organizations build a longitudinal patient health record.

About CliniComp, Intl.

San Diego-based CliniComp, Intl. is a global provider of enterprise clinical documentation systems proven to improve the efficiency and safety of health care providers’ highest-acuity workflows. The *Essentris* suite supports over 60 percent of military health system inpatient beds as the inpatient clinical documentation solution for AHLTA and has supported patient care at leading health care systems such as VA North Texas Health Care System, UCLA Health System and Tenet Healthcare throughout the country for over 26 years.
