FOR IMMEDIATE RELEASE

**CLINICOMP'S LATEST ESSENTRIS SOLUTION RECEIVES ATO (APPROVAL TO OPERATE)
CERTIFICATION FROM U.S. DEPARTMENT OF DEFENSE**

Certification validates DoD's trust in CliniComp to provide a safe and secure system

San Diego – Jan. 28, 2008 – [CliniComp Intl.](#), a leading provider of intelligent charting and surveillance solutions, today announced that Essentris™ 1.4.2 received the U. S. Department of Defense's ATO (Approval to Operate) certification, paving the way for any military hospital to install and connect the latest version of CliniComp's Essentris suite to its information technology network.

Under [DIACAP](#) (Department of Defense Information Assurance Certification and Accreditation Process) the DoD certifies information systems as meeting a strict set of security requirements and then accredits them for operation. The ATO certification and accreditation gives military officials the green light to deploy Essentris 1.4.2 on their hospital's computer network.

"Essentris' passing the DoD's rigorous security standards reaffirms their trust in us to provide a high level of clinical system safety and security for protecting patient privacy and data integrity," said J.F. Lancelot, president, Technology & Operations, CliniComp, Intl. "We're proud to support the Military Health System's initiative in making information easily accessible for informed clinical decision making and continuity of care for our wounded warriors."

About CliniComp

CliniComp is a leading provider of multidisciplinary charting and surveillance solutions to leading hospitals and health systems. In its nearly two-decade history, CliniComp has been a pioneer in bridging the gap between the back-office and the bedside by extending existing HIS and ancillary systems to the point of care. The Essentris enterprise solution maximizes IT investment and enforces consistent workflow across all aspects of patient care. Essentris' use of a single multidisciplinary electronic chart enables caregivers to easily access an enterprisewide view of the total clinical experience and provides a new generation of real-time clinical surveillance and analysis tools. The result is a dramatic improvement in quality and safety of patient care, outcomes and clinical decision-making. Essentris is deployed at approximately 50 client sites, including UCLA Healthcare, Baptist Health South Florida and Tenet Healthcare Corporation. CliniComp also has a sizable deployment across the Military Health System, covering more than 45 percent of all Department of Defense beds. For more information, visit www.clinicomp.com or call 800.350.8202.
