FOR IMMEDIATE RELEASE

BEST PRACTICES DRIVE LOURDES HEALTH SYSTEM’S MULTI-SITE DEPLOYMENT OF CLINICOMP’S ESSENTRIS PERINATAL SOLUTION

New system automates clinical workflow and documentation across entire perinatal continuum

San Diego, Calif.–June 23, 2007—[CliniComp, Intl.](#), a leading provider of intelligent charting and surveillance solutions, today announced that [Lourdes Health System](#) will deploy its Essentris™ Perinatal Solution at multiple sites including two New Jersey-based hospitals, Our Lady of Lourdes Medical Center in Camden and Lourdes Medical Center of Burlington County in Willingboro. Lourdes Health System is part of Catholic Health East, one of the nation’s leading healthcare systems.

Lourdes selected Essentris after an extensive market evaluation process and the system’s demonstrated ability to support evidence-based best practices across the continuum of perinatal care.

Essentris Perinatal is an integral part of Lourdes’ Labor and Delivery, Recovery, Mother/Baby and Pediatric units of both hospitals, with the solution being implemented in the Special Care Nursery in Willingboro and in the Intensive Care Nursery in Camden. The two facilities combined deliver more than 2,000 babies per year.

“We are excited because Essentris will provide an electronic maternal chart that is integrated throughout our care continuum,” said Cecilia Taylor, assistant vice president of patient care services for Our Lady of Lourdes Medical Center. “From the moment the mother sees an OB/GYN physician at one of our clinics to the time she leaves the hospital after delivery, we will be able to follow her progression with a single paperless record.”

According to Taylor, hospital administrators, nurses and physicians all reviewed competing clinical applications before selecting CliniComp’s Essentris. “The system is intuitive and easy to

follow,” she said. “We unanimously agreed that it was the best product on the market for our purposes.”

Essentris Perinatal is uniquely designed to manage clinical workflow across the entire continuum of perinatal care: ante partum, labor and delivery, postpartum to Neonatal Intensive Care Unit (NICU). It provides integrated modules for fetal surveillance, maternal charting and Neonatal (level 3) ICU management. The system captures and links all episodes of care including mother to baby information into a longitudinal electronic medical record. Essentris Perinatal is built on the award-winning Essentris platform, a multidisciplinary, hospital-wide charting and surveillance solution.

“Lourdes Health System is an acknowledged leader of women and children’s services, and its clinical team certified that Essentris meets the highest standards, which once again affirms our technology platform and full-service commitment,” said John Reardon, president and chief executive officer, CliniComp, Intl.

About Lourdes Health System

Lourdes Health System is one of southern New Jersey’s leading health care providers. The system is comprised of Our Lady of Lourdes Medical Center, a 410-bed regional referral center located in Camden, and Lourdes Medical Center of Burlington County, a 249-bed community hospital located in Willingboro. The Lourdes Health System is sponsored by the Franciscan Sisters of Allegany, N.Y., and is a member of Catholic Health East, a health system with 31 hospitals on the East Coast. About CliniComp

CliniComp is a leading provider of multidisciplinary charting and surveillance solutions to leading hospitals and health systems. In its nearly two-decade history, CliniComp has been a pioneer in bridging the gap between the back-office and the bedside by extending existing HIS and ancillary systems to the point of care. The Essentris enterprise solution maximizes IT investment and enforces consistent workflow across all aspects of patient care. Essentris’ use of a single interdisciplinary electronic chart enables caregivers to easily access an enterprise-wide view of the total clinical experience and provides a new generation of real-time clinical surveillance and analysis tools. The result is a dramatic improvement in quality and safety of patient care, outcomes and clinical decision-making. Essentris is deployed at approximately 50 client sites, including UCLA Healthcare, Baptist Health South Florida and Tenet Healthcare

Corporation. CliniComp also has a sizable deployment across the Military Health System, covering 40 percent of all Department of Defense beds. For more information, visit www.clinicomp.com or call 800.350.8202.
