

CliniComp, Intl.

MEDIA ALERT

CLINICOMP INTL. PRESIDENT ALAN PORTELA TO ADDRESS MEANINGFUL USE AT THE TRANSFORMING HEALTHCARE THROUGH HEALTH IT SUMMIT

WHAT: At the [Transforming Healthcare through Health IT Summit](#), presented by the Institute for Health Technology Transformation, Alan Portela, president of CliniComp, Intl., the leading global provider of clinical documentation systems, will participate in the general panel session, "*Meaningful Use and Meaningful Results from Electronic Health Records.*"

Moderated by Judy Hanover, Research Manager for IDC, the panel will:

- Provide an overview of the current understanding of the Electronic Health Records (EHR) opportunities presented by the American Recovery and Reinvestment Act (ARRA).
- Present IDC Health Insights' findings on best practices and key learnings derived from research with EHR early adopters who have achieved meaningful results.
- Discuss meaningful use and concerns surrounding EHR selection, implementation and adoption from both the vendor and provider perspectives.

The conference agenda is available at: <http://www.ihealthtran.com/csfall.html>.

WHY: The ARRA grants U.S. provider organizations an opportunity to recoup costs associated with the acquisition and implementation of EHR technology. This panel will convey critical information that U.S. providers need when making EHR investments and implementations under the tight ARRA "meaningful use" deadlines. The panel was created to help attendees avoid the less-than-optimal results that often occur in rushed IT implementations and to help them leverage learnings and best practices from early EHR adopters. The information presented will help ensure that their organizations achieve both statutory meaningful use and meaningful results from their EHR investment.

TIME/DATE: Wednesday, Nov. 4, 2009, from 2:30 to 3:30 p.m.

WHERE: Hotel Sofitel Los Angeles, 8555 Beverly Blvd., Los Angeles, CA 90048, (310) 278-5444
